

ST-RI 30LC

30 litres volume

Key Features:

Internal dimension: 2000X90X170 mm
External dimension: 2180x450x1000 mm
Frequency: 24kHz
Ultrasonic power: 1200W
Transducers: 20 units
Heating power: 6000W
Thermostat: yes
Temperature: 0-55°C
Material: stamped stainless steel AISI 304L
Cooling system: high efficiency fans
Washing pump: yes / 370W
Drain outlet: yes / drainage water polo valve
Basket: included / stainless steel
Power supply: 220Vac - 50Hz - Single Phase
Certification: CE

Ultrasonic tanks for the textile sector

Customization

This ultrasonic cleaning tank is engineered with precision for the textile sector, targeting the efficient cleaning of weaving combs. It boasts customizable technical specifications and modular dimensions, ensuring seamless integration into the client's existing plant infrastructure. This design philosophy aims to optimize operational continuity by significantly reducing downtime within the production environment.
